SUMMARY

Final-year Computer Science student passionate about backend development and scalable API architecture.Experience building real-world systems with Golang, Node.js, Flask, and Docker during internships and projects.Strong foundation in data structures, databases, and software engineering principles. Eager to contribute to high-impact backend systems in fast-paced tech teams.

SKILLS SUMMARY

Languages: C++, SQL, HTML, CSS, JavaScript, Golang, Java
Framework & Libraries: Express.js, Node.js,React.js, Springboot
Tools: Git, Postman, Docker
Others: REST APIs, Unit Testing, Debugging, Agile, JWT, CI/CD

PROFESSIONAL EXPERIENCE

Backend Developer Intern

ConnectWise | June 2024 – August 2024

- Developed and maintained backend services for a vulnerability scanning platform using Golang and Wazuh.
- Integrated security tools and APIs to automate vulnerability detection and reporting.
- Designed optimized PostgreSQL schemas for scalable data storage.
- Wrote over 50 unit and integration tests, improving code reliability by 35%.

PROJECTS

Portfolio : Live

- Developed a responsive personal portfolio website using React.js for frontend and Node.js for backend.
- Deployed backend on Railway and frontend on Vercel, enabling real-time project updates and live demos.
- Integrated interactive project showcase, GitHub links, contact form, and modern UI/UX for a professional portfolio.

Morden Attendance App : 🔗 Github

- Developed a full-stack attendance management application using React.js for frontend and Node.js/Express for backend.
- Implemented real-time attendance tracking, student management, and secure authentication.
- Integrated responsive design, interactive UI, and data storage using MongoDB.

EDUCATION

Bachelor of Engineering in Computer Science | **December 2021 – June 2025**
Sant Gadge Baba Amravati University

- Strong foundation in software development, data structures, and databases.

ACHIEVEMENTS

- Certified in Cybersecurity Essentials.
- Participated in research and development projects focused on accessibility and cybersecurity.
- Applied core computer science principles to practical use cases involving backend logic, APIs, and databases.
